

I have listened to K-love Christian radio for many years on my way to and from work and in the car with my family. It has been a source of encouragement through tough trials in our family and a source of teaching and training for my children that life is encouraging and God should be #1 and glorified. It has brought us happiness and hope in a world that isn't so lovely sometimes. Please do not create regulations that change or reduce how stations such as these broadcast and change lives everyday/every hour.
